## EZCALIPRE ELECTRONIC MEASURING SYSTEM

# Autorobot<sup>®</sup> EzCalipre

2/3D Electronic Measuring System

- ⇒ Provides accurate assessment of damage.
- ⇒ Easy to use with hoist, any repair bench or independently.
- ⇒ Prints before and after reports of repairs.
- ⇒ **Includes Data & Photos on CD.**

- Package includes:**
- ⇒ Computer & Printer
  - ⇒ Battery Charger & Batteries
  - ⇒ Wireless Tram Bar with Extension
  - ⇒ Wireless Router
  - ⇒ Measuring Cups & Tools
  - ⇒ First Year CD Data Update
  - ⇒ Mobile Storage Trolley

### This Many EzCalipre Customers Cant Be Wrong!!!

Archie Davies	P & M MBR Cabalaba	J.P.V Custom Automotive
Sheens / Cuthbert	Frankston Arc	L.P Bodyworks

## EZCALIPRE ELECTRONIC MEASURING SYSTEM

### Applicable everywhere

System calibrating and 3D measuring can be done on the body shop yard or on a post lift when estimating the vehicle's repair cost, or during straightening work when the car is mounted in a frame bench of any kind, or when the car has been brought in an inspector's office to be certified for road-worthiness for example.

### Modern data transfer

Data on vehicle's present condition, which is provided by EzCalipre's length sensor and inclinometer for height, gets transmitted in the PC measuring software with wireless WLAN connection (Wireless Local Area Network). Immediate, direct data transfer totally eliminates mistakes with typing etc. Measuring results can be viewed immediately both on EzCalipre tram gauge display and on PC screen.

### Areas of use

EzCalipre is suitable for measuring passenger vehicles, cross country vehicles and vans, and its' most essential purpose is to serve body shop diagnostics and structural vehicle repair. Wireless and easily portable with the carry case, it is easy to move around. Just like your laptop, EzCalipre batteries make it a mobile solution which adapts to the moving work of insurance company inspectors, for example.

### Damage estimation

Measuring with EzCalipre makes vehicle straightening work quicker and ensures the quality of your work. EzCalipre's technique is supported by Autorobot's own, very comprehensive vehicle data files.

### Wireless data transfer

EzCalipre central processing unit (CPU) reads the exact locations of the vehicle points with the help of in-built sensors for length and vertical inclination. Measuring points can be selected in the display of the CPU, and saved in the computer database.
