Drester 1000

The Drester 1000 has set the standard since the very beginning of water-borne gun cleaners. It was developed in close cooperation with the leading paint manufacturers and suits all paint systems on the market. For more information on water-borne gun cleaning in general

FEATURES

- **Manual cleaning with brush and high pressure rinse gun**

The gun is quickly and easily cleaned externally with the flow-through brush and the gun's paint channel is rinsed with the effective high pressure rinse gun. The rinse gun can easily be connected to either recirculating water or to tap water.

- **Waste water recovery system**

The waste water is easily recycled through the built-in flocculation and filtration system. After cleaning 30-40 guns, the water is used up. By adding flocculation powder to the waste water, the waste separates from the water and can be filtered away. When the waste is flocculated, the bottom drain is opened and the flocculate is let through the filters. The filters hold 35 liters, meaning that you can dump the whole batch of waste at once. To allow the filters to be re-used 5-8 times, two filters

- **Drester diaphragm pump**

The pump is the heart of any gun cleaner and it is the most critical component for performance and durability. Unlike any other pump, the Drester diaphragm pump was developed specifically for use in gun cleaners, which enabled

- **Round sink**

for easy and convenient maintenance

- **Pump**

Equipped with the superior Drester diaphragm pump

- **Air pressure**

Equipped with air pressure regulator
Easy install?, small footprint?, pump warranty

- **Evacuation**

After filtration the water can be re-used or pumped away into the

TECHNICAL DATA

Type: Drester 1000
Liquid volume: 35 l
Working pressure: 5-12 bar, 100l/min
Weight (net) 24 kg
Water flow through the pre-wash brush: 1.5-2 l/min
Water flow through the rinse gun: 1.5-2 l/min

Main accessories and consumables:

AquaSolve
Primary fi lter R8702 (5 pcs)
Main fi lter R8701 (5 pcs)
8703 Budget mail filter (5 pcs)
Flocculation powder 9211
Flush gun* 8970

ATEX: Category 3
