

# KS - Gun

**March 2016**

Gun for under body protection

## Appliance

KS – Gun rebuilds the original structure of under-body and stone chip protection. The material- and air supply of the KS- Gun are adjustable. It is not necessary to clean the gun after use because the material inside of the gun does not dry up when the material needle is closed to the maximum.

## Characteristics

- Safety valve for usage of 1 litre tins
- pressure max.: 10 - 12 bar /135 – 162 psi
- optimal working pressure: 2 – 4 bar / 27 - 54 psi
- air consumption: 130 - 250 l/min. / 1,53 – 2,95 cfm
