

PRESS-IT 2.0

Punch perfect holes into bumpers - without big efforts.

Why PRESS-IT 2.0?

Best tool steel.
Our new punches.

On the first use of our new punches they will convince with high quality. This quality is further supported by the haptic. Punching holes has never been easier. Of course in practice they allow an easy way of working and an impressive result. The millimeter-precise punches were manufactured by high standard of quality - Made in Germany.

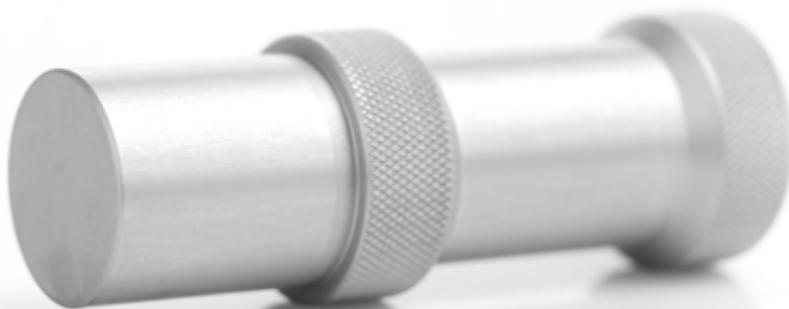

Further developed design.
Improved ball-bearings.

In line with the new design of Press-it, the Press-it 2.0 our handle was further developed as well. Now you need, through the improved ball bearing less force for punching the holes. In matter of design and haptic we brought the handle to a new level to optimize your feeling of joy and comfort while working. Natural we chose best tool steel for this.

Centering aid and controller - Made in Germany.

The supplied mandrel for the optimal alignment of the PDC-holder. As the holes often differ a tenth of a millimeter of other car models, the mandrells will help to measure the correct size of the hole on the old bumper of the vehicle.
