

The Press-it hole puncher kit is designed for punching holes into bumpers to mount parking sensors. With the different cutters you can switch between hole sizes and forms. Thus the holes have the optimal diameter and form for the PDC sensors. Another advantage of PRESS-IT 2.0 is that pressing in the holes is taken place after the painting. The contour mandrel is threaded through the pre-drilled hole and must be aligned to the marked contour. The precise cutting edge punches the hole shape-accurate into the painted bumper. Consequently time-consuming grinding is obviated.

Dimensions and weight

L x B x H: x x mm

Gewicht: kg

TECHNICAL DATA

| | |
|-----------------|--------------------------------|
| Material: | hardened tool steel, brunished |
| Made in: | Germany |
| Application by: | Ford |

BENEFITS

- Easy and professional punching of holes, according to the requirements of most automobile manufacturer
- With the right cutter a custom-fit hole is punched into the bumper

SCOPE OF DELIVERY

- Handle with ball bearings
- Punch #01
- Punch #02
- Punch #04
- Punch #05
- Punch #08
- Punch #09
- Punch #10
- Punch #11
- Punch #12
- Punch #15

- Drill 18 mm
- Instruction manual
- Case incl. Inlay
