Meguro Seam Sealer Tape

Menzerna seam sealer tape is a patented rubber tape designed to quickly and effectively recreate the OEM finish on doors, bonnets, boot lids and wheel arches.

Forget about messy seam sealer guns which require skill, take time, look bad and cannot be painted immediately.

Menzerna offers tape in 6mm, 8mm, 10mm and 20mm sizes in a contoured profile to perfectly replicate the finish on your European, Japanese, Australian or Korean car.

A new tape, in a half-moon shape, has just been introduced to the market, which is designed for the shape of some expensive European cars.

The tapes are adhesive. An aerosol primer acts as a rust inhibitor as well as assisting with the two pack bonding process.
