

The M3 GYS AUTO is a Synergic single phase MIG-MAG welding machine with 3 torch connectors. Ideal for car body repairs, it is recommended for welding steel, stainless steel, aluminium and for MIG Brazing of high-tensile strength steels (with CuSi3 and CuAl8 wires).

Synergic Mode

- The machine determines the optimum wire speed by selecting :
 - The type of wire
 - The wire diameter
 - The welding current

Spool gun

The M3 GYS AUTO is delivered with a Spool Gun torch. This motorised torch is suitable for aluminium, stainless steel, copper and steel (contains 1kg/∅100mm wire reels).

- Ideal for soft wire such as AlSi5 or AlSi12 (recommended for car body repairs)
- Ease of use : adjust the wire speed directly on the Spool Gun torch.
- The machine is delivered with a balancing system to support the Spool Gun torch.

4 Drive rolls motor

- Suitable for 5kg/∅200mm and 15kg/∅300mm wire reels.

Saving welding parameters

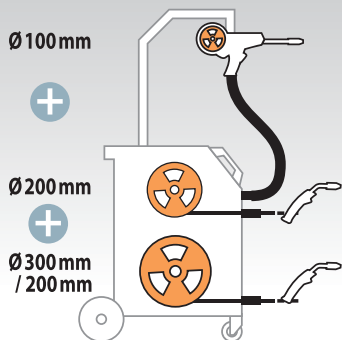

Memory save feature for each torch and activation of the 'last used' welding parameters (wire diameter, wire type and mode).

Accessories

- Delivered with :
- 2 Steel torches 150A - 3m
 - 1 Spool Gun
 - 1 Earth clamp - 3m
 - 1 Balancing system (Regulator not included)

+ ADVANTAGES

2 torches, 2 integrated wire feeders + 1 Spool Gun - The M3 GYS AUTO is a multifunction and flexible machine designed to weld 3 different types of wire at the same time. It saves time since it does not require to disassemble the torch and change the wire reel for another job.

Capable of welding:

- Soft wires: as AlSi and CuAl necessary for welding HLE/THLE metal sheets
- Aluminium wires
- Steel wires
