

INTRODUCTION:

A revolutionary alternative to the clay bar. Features a 12" x 12" microfiber towel with a polymer rubber layer bonded to one side. Just fold the towel into a pad and you can remove all surface contamination on vehicles faster and more effectively than a clay bar. Can be rinsed and reused numerous times.

- Use on painting, glass, tile, marble, chrome plate surface for car and motorcycles, aquarium supplies, household supplies.
- Do not use on surfaces over 145°F, otherwise the polymerized rubber surface will start to melt.
- Use only car shampoo or clay lubricant to attain the best results.
- Towel is not solvent resistant.
- 40-50 usages per towel (dependent upon contaminants encountered)
- Keep away from children.
