

Old or defective rivets often need to be removed from the sheet metal structure when repairing body panels. To avoid having to drill out these rivets, the old rivet can be pressed out of the sheet metal structure using the extraction mandrel and extraction die, thereby minimising damage.

Dimensions and weight

L x B x H: 2,8 x 1,6 x 1,10 mm

Gewicht: 0,04 kg

TECHNICAL DATA

Designed for :	60 kN / 6 T
Suitable for:	PNP 90
Application:	pressing out rivets
Thread :	M6
Made in :	Germany
Manufacturer:	TKR PowerTools

BENEFITS

- Original TKR-Accessorie
- High Quality - Made in Germany
- High endurance

SCOPE OF DELIVERY

- Extraction Mandrel
- Extraction Die
