RHONE 2.8T BENCH WITH NAJA

YOU CANNOT MANAGE WHAT YOU DO NOT MEASURE

Celette's Naja Evolution 3D software directly takes measurements from OEM-provided 3-D CAD drawings and provides technicians with unique views of the control points in relation to length, width and height, allowing for an efficient damage analysis on a database of more than 14,000.

FEATURES

- New 3D system supports visualisation of actual points in space.
- Produce rapid diagnostic reports in under 10 minutes.
- System can be used on or off the bench.
- Online update facility.
- Bluetooth radio communications.
- Celette Naja Diagnostics
- Hardware combination
- Can be used on independent "Gazelle" support stand & most benches.
- Instantaneous measurement while placing the sensor against the measuring point.
- On site Installation & Training
- Approved by major motor manufacturers
- Optional anchoring arms available
- High Accuracy guaranteed

BENCH FEATURES

RHONE bench 380V Tri equipped with Sevenne pulling unit with extension and safety cable + sill clamps + decking plates and access ramps.

Rhone is a drive on bench with a lifting height of 4.33 ft. This bench enables the checking and the straightening with the MZ/MZ+ bracket sets and any of the CELETTE measuring systems. Installation of damaged vehicles thanks to the CELETTE trolley system.
