

ROAR 610 Extreme Cut

ROAR 610 is a versatile all in one compound that minimises process speed by completing both the cutting and polishing steps with one product. 610 Provides a fast cutting action to easily remove P1500 (or finer) sanding marks permanently. 610 is suitable for all paint systems including compliant HS, UHS and Scratch Resistant clears. The unique abrasive system will allow both cutting and polishing steps to be completed simply by using ROAR compound and polishing foams during a single application of 610 compound. Apart from the permanent removal of sanding marks, 610 will produce a high gloss swirl free mirror-like finish when buffed as a second step with ROAR (620PF) polishing foam.

Part number	610-10
Product size	1 kg
Containers per case	6

POLISHER
 Dual Action  Rotary

Features	Benefits
Extreme Fast Cutting Action	Permanently remove P1500 sanding marks
2 in 1	One compound can use for both compounding and polishing. Very simple
Contains No Filler	Permanent finish without die-back, hence no reworks
High Concentration	Economical in use, only a small amount required

APPLICATION OPTIONS

Compounding

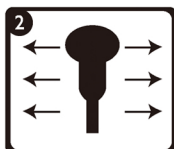

Finishing

HOW TO USE

Shake bottle well before use

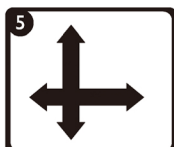

Before switching on polishing machine, spread the compound evenly on the surface.

Add suitable amount of compound which is about the size of a thumb to the surface.

Run the machine at 800-2000rpm.

Move the polishing machine in one direction with 50% overlap then change direction.

Check swirl marks have been removed, then wipe clean with a Microfibre Cloth.
