

MULTIBENCH

Structural Repair Workstation

POWERFUL

The Multibench employs an electro-hydraulic lift suitable for lifting most vehicles, with a maximum lifting capacity of 7,000 lbs to a height of over 4' 9". Technicians have the ability to work on vehicles at a comfortable height during the repair process.

LOW-PROFILE AND SMALL FOOTPRINT

Platforms sit flat on the ground to enable vehicles with limited ground clearance to easily drive onto the lift. A small footprint allows facilities of all sizes to place the Multibench in repair bays that cannot accommodate full size benches.

DIAGNOSTICS AND REPAIR

The pulling column provides 10 ton pulling capacity for serious vehicle straightening, 360° around the vehicle. Combined with the Touch electronic measuring system (optional), the Multibench is a single bay solution to repair vehicle damage.

VOLTAGE	208/230V
LIFTING CAPACITY	7,000 lbs
LIFTING HEIGHT	4' 9"
LIFT TIME (ASCENSION)	45 seconds
PULLING FORCE	10 ton

		MULTIBENCH PACKAGES			
		PACK 2.5	PACK 3	PACK 4	PACK 6
	90MINKIT25 Kit of low supports w/clamps	●	●	●	●
